

Download Mp3 Music Safely

DON'T Download JUNK! Make sure your download mp3 music is a quality mp3 and that your music download doesn't have hidden downloads that will not only ruin your search for great music but will annoy you and invade your privacy.

Here are the four hidden downloads most free music sites install on your computer when you download mp3's.

- 1.Spyware is almost always contained in mp3 freeware and shareware downloads. The spyware gathers information and monitors the activities you perform, unbeknown to you.
 - 2.Adware is also contained in these mp3 download networks. Your computer can and probably will be stuffed with a huge amount of intrusive advertising.
 - 3.Pornography is very prevalent on the Internet. Be very aware that porn peddlers disguise their software as the latest free mp3 download or game demo to redirect your modem to porn sites.
 - 4.Spoofing is when download mp3 networks are filled with fake files. For example, if you download what you think is a popular mp3 song, you will get the same ten seconds of the song over and over again.
- So in your hunt to download mp3 's and create your own library of music, be selective of which music download site you use. There are many to choose from but few that offer privacy protection, online service, tech help, spyware-free and adware-free downloads, as well as a large library of quality mp3's.

Things have come a long way with regards of how we listen to our favorite music. It's as easy as a push of a button with digital music.

Knowing where to start, how you want to listen to your music and what you want to do with it, is the first step. When you download mp3 files from online music services, you need to know what they allow you to do. Some songs are just for listening to, some can be downloaded, and some can be burned to a CD or a portable music player.

A few owners of certain artists publishing rights will not grant the license rights, which means some mp3's are not available for downloading.

The majority of the time, you'll find what you're looking for because the larger download MP3 subscription music web sites have access to the catalog of the Five Big Labels – Sony, Warner, Universal, EMI, and BMG, which account for about 80% of recorded music.

So now that you have the facts on how to download mp3 's, do some research for quality music download sites, take advantage of any Free Trials, download lot's of music, turn up the volume and don't forget to Sing Along!
